# WARRANTY POLICY

## US Motor Works, LLC

- USMW brand of US Motor Works, LLC products are warranted to be free from defects in material and manufacture, under normal use and service
- US Motor Works coverage will extend a full 12 months from the date of installation in an engine regardless of mileage or hours.
- US Motor Works will cover (replace free of charge or pay for) all labor and parts needed to repair the warrantable failure, including progressive damage to the engine concerned.

### **Conditions of the warranty are:**

1. US Motor Works must be notified by the customer before filing a warranty claim.
2. All warranty claims must be in writing and US Motor Works reserves the right to examine every single engine or part subject to a claim under this warranty
3. Price of parts will be based on the US Motor Works current price list or other accepted suppliers at US Motor Work's option. Cost of labor will be of reasonable hourly flat rate (overtime or holiday rates are not accepted).

### **The warranty is also subject to the following limitations:**

1. The provisions of this warranty shall not apply to any US Motor Works (USMW) brand part altered from its original specification (including but not limited to alterations in packaging and/or markings) or which has been misused, exposed to weather conditions, negligence or damage by accident.
2. The warranty shall be null and void, if the engine or vehicle is not maintained to the suggested OEM level. All receipts and record should be accounted for in the event it is requested for the warranty analysis.
3. This warranty is provided solely to direct customers of the US Motor Works and not any other party. It is the only agreement or obligation of US Motor Works. All other warranties, expressed or implied, including the warranties of merchantability and/or fitness for a particular purpose, are excluded.

# FUEL PUMPS

USMW Electric Fuel Pumps (modules, rebuild kits and in-tank fuel pumps) are designed with quality in mind. All product applications have been designed and tested to meet or exceed original equipment specifications. Our electric fuel pump kits contain all of the components and strainers needed to cover the largest range of applications possible with each kit.

## GENERAL FEATURES:

- \* 100% tested for flow and voltage to our high quality standards.
- \* Designed and manufactured with the best NEW electrical connectors to ensure trouble-free performance.
- \* Every Fuel Pump Module is supplied with a pigtail and other accessories necessary to properly complete the installation.
- \* Manufactured to original specifications for proper fit and easy installation.

# TABLE OF CONTENTS

Fuel Pump Application Guide .....	2-146
Fuel Pump Buyer's Guide .....	147-191
Fuel Pump Strainer Guide .....	192-198
Fuel Pump Installation Instructions .....	199-203
Fuel Pump Pressure and Flow Specifications .....	204-221
Fuel Pump Cross Reference .....	222-247
Fuel Pump Identification Guide .....	248-261
Fuel Pump Strainer Identification Guide .....	262-264

All Manufacturers names, numbers, symbols and descriptions are used for reference purposes only, and in no way does it imply that any parts listed in this catalog are the products of these manufacturers.

# USMW

## Professional Series

# Benchtop Fuel Pump Tester

### FEATURES AND BENEFITS:

- Compact Bench-top design with Internal fuse-protected Power supply
  - Tests Fuel Pumps and Modules
  - Large, High Precision, Glycerin Filled pressure Gauge
  - Large Heavy Duty Stainless Steel fluid tank with cover
- Removable pump / module holder with integrated splash shield
- Circuit breaker protected front mounted output terminals
  - High Precision Flow Meter
  - Analog Volt Meter and Ammeter
- Test harness and adapter leads included
  - Drain port in tank
- Full operating instruction booklet with Pressure and flow specifications for US MotorWorks Fuel Pumps and Modules.

Note: unit may differ slightly from picture due to continuous product improvement

US Motor Works, LLC is an active member of:

# FAILURE ANALYSIS

## ELECTRIC FUEL PUMPS AND FUEL PUMP MODULES

### CONDITIONS TO ACCEPT OR EXCHANGE UNITS

#### Units that have been modified are NOT acceptable

#### Units with Broken parts are NOT acceptable

#### Units with Dark, Clogged or Contaminated strainer are NOT acceptable

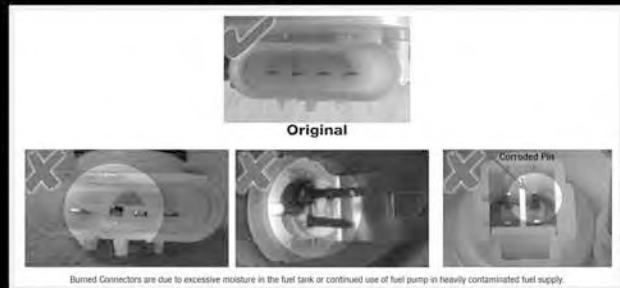

#### Units with Discolored Plastic and Hoses are NOT acceptable

#### Units with Corrosion, Rust, or Discoloration on pump bodies are NOT acceptable

#### Units with Burned Wiring and Connector are NOT acceptable

#### Marking on units that are acceptable for warranty

[WWW.USMOTORWORKS.COM](http://WWW.USMOTORWORKS.COM)

## FUEL PUMP GENERAL INSTALLATION INSTRUCTIONS AND PRECAUTIONS

### PRECAUTIONS:

- Work on a level surface.
- Use safety stands for support, not a jack.
- Keep an ABC fire extinguisher close by.
- Wear approved safety glasses
- Work in a well ventilated area.
- Do not smoke or allow open flames near vehicle.
- Disable fuel pump before servicing by removing fuse or battery cables.
- Relieve fuel system pressure before servicing pump.

**WARNING:** Gasoline is extremely flammable, so take extra precautions when you work on any part of the fuel system. Don't smoke or allow open flames or bare light bulbs near the work area, and don't work in a garage where a natural gas appliance is located. Gasoline is also carcinogenic, take the proper precautions and wear latex gloves when spills are possible. If fuel does come into contact with your skin, rinse it off immediately with soap and water. Mop up all fuel spills and do not store any fuel-soaked rags where they could ignite.

### B. NOTE:

PHYSICAL CONFIGURATION OF REPLACEMENT PUMP MAY NOT BE IDENTICAL TO THE PUMP BEING REMOVED, BUT REPLACEMENT PUMP WILL FUNCTION THE SAME AS THE PUMP BEING REMOVED.

In some applications the new pump may not mount in the same location as the pump being removed. This kit may service more than one vehicle, so there may be some parts left over after installation.

This pump will not remedy malfunctions of the filter, regulator, injectors, or other fuel system components. Diagnose fuel pump using procedures in service manual to confirm pump failure before proceeding with pump replacement.

### C. CAUTION:

THIS FUEL PUMP IS NOT APPROVED FOR AIRCRAFT OR MARINE USE.  
DO NOT RUN PUMP DRY OR DAMAGE COULD RESULT TO PUMP.  
DO NOT REUSE FUEL STRAINER.  
DIRT IS THE MAJOR CAUSE OF PUMP FAILURE, KEEP PUMP AND COMPONENT PARTS CLEAN AND FREE OF DIRT.

### D. FUEL PUMP REPLACEMENT:

Installation of replacement pump may require that some of the mounting or electrical hardware be reused. Do not destroy any hardware that might need to be reused on replacement pump.

1. Verify that the pump has failed.
  - ☒ Check all related fuel system components to verify that the fuel pump is the failed component.
2. Relieve vehicle fuel pressure.
  - ☒ Consult the vehicle specific repair manual for proper procedure.
3. Disconnect the negative terminal from the battery
4. Empty fuel from gas tank.
  - ☒ Drain fuel into approved containers and dispose of per local regulations
5. Remove fuel tank from vehicle (if required)
  - ☒ Consult vehicle specific repair manual for proper procedures.
6. Remove old fuel pump
  - ☒ Consult vehicle specific repair manual for proper procedures.
7. Clean inside of fuel tank
  - ☒ Fuel contamination is the leading cause for fuel pump failure.
  - ☒ Fuel tank must be clean and a new strainer must be installed with new fuel pump

8. Inspect wiring and hoses on vehicle.
  - ☒ Inspect all original equipment wiring and hoses for damage.
  - ☒ Wiring harness must be replaced if included with fuel pump kit.
  - ☒ Replace all worn or deteriorated hoses and fittings.
9. Install new fuel pump / Fuel Pump Module and strainer
  - ☒ Always replace strainer with new parts when replacing fuel pump
10. Re-install fuel tank (if required)
  - ☒ Consult vehicle specific repair manual for proper procedures
11. Replace fuel filter
  - ☒ Clogged fuel filter will reduce fuel pump life and produce low fuel pressures
12. Fill tank **completely** with clean fuel
  - ☒ Complete Fuel pump / Fuel Pump Module must be submerged in order for fuel pump / fuel system to prime.
  - ☒ Wait a minimum of 5 minutes for Fuel Pump Modules to prime before starting vehicle.
13. Start engine and check for leaks
  - ☒ Reconnect battery cable
  - ☒ Key may need to be switched on and off several times before proper fuel system pressure is achieved.
  - ☒ Check for leaks

NOTE: A loss of oil pressure or defective oil pressure switch may cause the fuel pump to be inoperative.

### INSTALACION DE LA BOMBA DE COMBUSTIBLE ELECTRICA HOJA DE INSTRUCCIONES

#### A. PRECAUCIONES DE SEGURIDAD:

Trabaje sobre una superficie nivelada.  
 Use soportes de seguridad, no use un gato hidr ulico.  
 Mantenga un extinguidor ABC a la mano.  
 Use gafas de seguridad adecuadas  
 Trabaje en un rea bien ventilada.  
 No fume ni permita llamas abiertas cerca del vehiculo.  
 Desconecte la bomba de combustible antes de darle mantenimiento quitando el fusible o los cables de la bater a.  
 Deje escapar la presi n del sistema de combustible antes de dar mantenimiento o cambiar la bomba.

ADVERTENCIA: La gasolina es extremadamente inflamable, as que tome todas las precauciones adicionales cuando usted trabaje en cualquier parte del sistema de combustible. No fume ni permita las llamas abiertas y no use bombillas descubiertas cerca del rea de trabajo, no trabaje en un garage donde haya un equipo de gas natural. La gasolina es tambi n carcin gena, tome las precauciones apropiadas y use guantes del l tex cuando haya un derrame de gasolina. Si el combustible entra en contacto con su piel, enjuague inmediatamente con jab n y agua. Absorba todos los derrames del combustible y no guarde ning n trapo empapado de gasolina porque podr a prenderse.

#### B. NOTA:

ES POSIBLE QUE LA APARIENCIA FISICA DE LA BOMBA DE REPUESTO NO SEA IDENTICA A LA DE LA BOMBA QUE SUSTITUYE, PERO LA BOMBA DE REPUESTO FUNCIONARA IGUAL A LA BOMBA QUE VA A CAMBIAR.  
 En algunas aplicaciones la bomba nueva no quedara instalada en el mismo sitio que la bomba que sustituye. Esta bomba se adapta a mas de un modelo de vehiculo. Pueden sobrar algunas piezas al terminar la instalaci n.  
 Esta bomba no soluciona los problemas en el filtro, regulador, inyectores o de otros componentes del sistema de combustible. Use los procedimientos indicados en el manual de servicio para confirmar la falla de la bomba antes de reemplazarla.

#### C. PRECAUCION:

ESTA BOMBA DE COMBUSTIBLE NO ESTA AUTORIZADA PARA USO MARITIMO O EN AERONAVES. NO OPERE LA BOMBA EN SECO, PUEDE CAUSARLE DA OS. NO UTILIZE EL CEDAZO USADO. LAS IMPUREZAS SON LA CAUSA PRINCIPAL DEL MAL FUNCIONAMIENTO DE LA BOMBA. MANTENGA LIMPIA LA BOMBAY DEMAS PIEZAS.

#### D. REEMPLAZO DE LA BOMBA DE COMBUSTIBLE.

Es posible que deba volver a utilizar piezas de montaje o el ctricas durante la instalaci n de la bomba de repuesto. No destruya las piezas que pudiera necesitar en la instalaci n de la bomba de repuesto nueva.

- 1 Verifique que la bomba ha fallado.
  - ☒ Compruebe todos los componentes relacionados del sistema de combustible para verificar que el surtidor de gasolina es el que causo la falla.

2. Deje escapar la presión del combustible del vehículo.  
‡ Consulte el manual de reparaciones específico del vehículo para el procedimiento apropiado
3. Desconecte el cable del poste [terminal] negativo de la batería
4. Vacíe el combustible del tanque [depósito de gasolina]. Drene el combustible en envases apropiados y siga todas las regulaciones locales.
5. Quitar el depósito [tanque] de gasolina del vehículo (si se requiere)  
‡ Consulte el manual de reparaciones específico del vehículo para los procedimientos apropiados.
6. Quite la bomba de gasolina vieja  
‡ Consulte el manual de reparaciones específico del vehículo para los procedimientos apropiados.
7. Limpie bien dentro del depósito de gasolina  
‡ La contaminación del combustible es la causa principal que ocasiona la falla de la bomba de gasolina.  
‡ El depósito de gasolina debe estar limpio y un nuevo filtro se debe instalar con la nueva bomba de gasolina
8. Examine los cables y las mangueras en el vehículo.  
‡ Examine todo el cableado y mangueras del equipo original para saber si hay daños.  
‡ El armazón del cableado debe ser sustituido si está incluido en el kit de la bomba de gasolina.  
‡ Reemplace todas las mangueras gastadas o deterioradas.
9. Instale la nueva bomba y el nuevo módulo con el filtro nuevo de la bomba de gasolina  
‡ Sustituya siempre el filtro con las piezas nuevas al cambiar la bomba de gasolina
10. Reinstale el tanque de gasolina (si se requiere)  
‡ Consulte el manual de reparaciones específico del vehículo para los procedimientos apropiados
11. Sustituya el filtro de combustible  
‡ El filtro de combustible sucio y viejo reducir la vida de la bomba de gasolina y producir presiones de combustible bajas
12. Llene el tanque **totalmente** con combustible limpio  
‡ La bomba completa de gasolina /el módulo completo se deben sumergir completamente dentro del tanque para que el sistema se prepare a cargar.  
‡ Espere un mínimo de 5 minutos para que la bomba de gasolina se prepare a cargar antes de encender el vehículo.
13. Encienda el motor y asegúrese de que no haya fugas  
‡ Vuelva a conectar el cable de la batería  
‡ La llave en el switch puede necesitar ser cambiado en on y off por varias veces antes de que se alcance la presión apropiada del sistema de combustible.  
‡ Asegúrese nuevamente para saber si hay escapes

NOTA: Una pérdida de presión de aceite o un interruptor de presión de aceite defectuoso, pueden dejar la bomba fuera de servicio.

# US MOTOR WORKS ELECTRIC FUEL PUMP PRESSURE AND FLOW SPECIFICATIONS

- A. Testing performed using USMW Bench Top Fuel Pump Tester at voltage of 12.5 Volts.
- B. Please note that Pressure and Flow readings will vary based on test voltage and fuel line size.
- C. **FLOWRATE** is tested at unrestricted, Wide-Open Flow.
- D. Fuel Pump Flowrate specifications have an acceptable tolerance of +/- 10%.
- E. **PRESSURE** is measured at full pump bypass (output completely closed)
- F. Full bypass pressure should be between the noted MIN and MAX values

# US MOTOR WORKS ELECTRIC FUEL PUMP PRESSURE AND FLOW SPECIFICATIONS

- A.** Testing performed using USMW Bench Top Fuel Pump Tester at voltage of 12.5 Volts.
- B.** Please note that Pressure and Flow readings will vary based on test voltage and fuel line size.
- C.** **FLOWRATE** is tested at unrestricted, Wide-Open Flow.
- D.** Fuel Pump Flowrate specifications have an acceptable tolerance of +/- 10%.
- E.** **PRESSURE** is measured at full pump bypass (output completely closed)
- F.** Full bypass pressure should be between the noted MIN and MAX values

# US MOTOR WORKS ELECTRIC FUEL PUMP PRESSURE AND FLOW SPECIFICATIONS

- A. Testing performed using USMW Bench Top Fuel Pump Tester at voltage of 12.5 Volts.
- B. Please note that Pressure and Flow readings will vary based on test voltage and fuel line size.
- C. **FLOWRATE** is tested at unrestricted, Wide-Open Flow.
- D. Fuel Pump Flowrate specifications have an acceptable tolerance of +/- 10%.
- E. **PRESSURE** is measured at full pump bypass (output completely closed)
- F. Full bypass pressure should be between the noted MIN and MAX values

# US MOTOR WORKS ELECTRIC FUEL PUMP PRESSURE AND FLOW SPECIFICATIONS

- A. Testing performed using USMW Bench Top Fuel Pump Tester at voltage of 12.5 Volts.
- B. Please note that Pressure and Flow readings will vary based on test voltage and fuel line size.
- C. **FLOWRATE** is tested at unrestricted, Wide-Open Flow.
- D. Fuel Pump Flowrate specifications have an acceptable tolerance of +/- 10%.
- E. **PRESSURE** is measured at full pump bypass (output completely closed)
- F. Full bypass pressure should be between the noted MIN and MAX values
