RS5000™X SHOCK ABSORBER

CROSS-TUNED TECHNOLOGY

Inside the new, innovative Rancho® RS5000™X shock is a unique, patented valving system and advanced compression functionality. Developed by the engineers at Rancho, The Rancho RS5000X Cross-Tuned Technology will improve the vehicle's overall on- and off-road handling and performance.

PROGRESSIVE ENGAGEMENT VALVING:

The Rancho RS5000X Series design includes patented progressive rebound and compression discs. At lower speeds or in the earlier stages of the Shock's travel, an eccentric disc in the valve shim stacks will engage the valving at lower frequencies, helping to control the energy of motion as the cycle of the Shock increases or decreases in its action.

When hitting a pothole, off-road trail obstacle or similar activity, **Rancho's Progressive Engagement Valving** allows for early flow of fluid, helping to reduce harsh initial impacts and to control the flow of fluid in a progressive, gradual manner through the valving.

During on- or off-road driving activities like washboard roads or when traveling a rough fire road, the early flow of fluid helps to minimize a "rough" ride as the piston movement is able to glide through the initial travel motion of the Shock with minimal ground impact or force. If needed, the Progressive Engagement Valving will further engage to maintain control and stability.

6-in. SUSPENSION SYSTEM

The engineers at Rancho® have redesigned the 6-inch Suspension System for the 2014-2010 Ford F-150. The performance kit now includes front Strut Towers (no need to buy separately), Rancho's fully boxed welded subframe for superior strength and ductile Iron steering knuckles. HIGH-CLEARANCE STEERING KNUCKLES

The Rancho® High-Steer Knuckles maintain steering geometry and add strength to the most vulnerable points within the steering envelope when off-road driving. The knuckles add an additional 1.5-inches of clearance within the tight space, helping to protect critical steering components, and their design also helps lift the steering linkage out of range from direct impact from off-road obstacles or impediments. The High-Steer Knuckles are precisely engineered and heavy-duty for Left Hand and Right Hand Drive, 3-inch and higher lifted Jeep Wrangler JK's. The kit includes: a front left High-Steer Knuckle, a front right High-Steer Knuckle and 3-inch bump stops. This product offers a Limited Lifetime Warranty. TRACK BAR BRACKET

Dramatically improve a lifted Jeep JK's overall handling and reduce body roll through the Rancho Track Bar Relocation Bracket. Built to the Rancho brand's exacting standards of engineering and materials, the bolt-on bracket helps to strengthen the factory mount for heavy off-road use. The bracket – easily installable with basic hand tools – relocates the factory or aftermarket steering stabilizer to a higher, less-susceptible-to-impact location. The Rancho Track Bar Bracket features a powder-coat finish. All Rancho® RockGEAR™ components are covered by a Limited One Year Warranty**.

Add-A-Leaf/Lev-A-Load

Installation of a Rancho® Suspension System can increase the risk of vehicle rollover in abrupt maneuvers.

Many states have laws governing modification of original equipment suspension systems. Such laws may prohibit any modification which adversely affects safety or any modification altering the suspension more than a specific number of inches. Rancho® Suspension recommends that you contact local law enforcement in your area before modifying your suspension.

Rancho® does not recommend or endorse the use of its products in conjunction with those of other aftermarket suspension or lift kit manufacturers.

Do not use on vehicles with a mechanical Link Rear Proportioning Valve. Height may vary due to condition of Stock Springs. Check U-bolt length prior to installation, to see if there is enough threaded length to accommodate the new Add-A-Leaf. Approx. 1/2" to 3/4".

2 1976½ - 1986 Blazer or Jimmy and short bed pickups with a 4" suspension system will require a transfer case lowering kit part number RS6631. Some vehicles equipped with 2½" suspension system may experience a driveline vibration. Part number RS6631 can be used to possibly correct the vibration, but a driveline vibration may still be present. CAUTION: RANCHO® DOES NOT RECOMMEND INSTALLING A 4" SUSPENSION SYSTEM ON VEHICLES EQUIPPED WITH THE "LONG" REAR TAIL SHAFT HOUSING, REAR UNIVERSAL WEAR WILL BE ACCELERATED AND DRIVELINE VIBRATION WILL OCCUR.

ES El Blazer o Jimmy 1976½ - 1986 y las camionetas de plataforma corta con un sistema de suspensión de 4 pulgadas requerirán un kit de bajada de caja de transferencia número de pieza RS6631. Puede que algunos vehículos equipados con un sistema de suspensión de 2½ pulgadas experimenten vibración de la línea de impulsión. La pieza número RS6631 se puede usar para posiblemente corregir la vibración, pero puede que aún esté presente una vibración de la línea de impulsión. PRECAUCIÓN: RANCHO® NO RECOMIENDA INSTALAR UN SISTEMA DE SUSPENSIÓN DE 4 PULGADAS EN VEHÍCULOS EQUIPADOS CON LA CARCASA DEL EJE TRASERO DE TIPO "LARGO", YA QUE EL DESGASTE UNIVERSAL TRASERO SE ACELERARÁ Y OCURRIRÁ VIBRACIÓN DE LA LÍNEA DE IMPULSIÓN.

Ejemplo: Si el Sistema Rancho® está catalogado como de 3 pulgadas, pero las barras de torsión de un vehículo están ajustadas a 1 pulgada sobre el valor de serie, la altura elevada neta será 2 pulgadas. La altura elevada neta será 1 pulgada menos en los vehículos equipados con el paquete todoterreno Z71.

FR La hauteur élevée nette obtenue grâce à ce système dépend du réglage des barres de torsion avant l'installation. Exemple : Si le système Rancho® est indiqué comme étant de 3 po (7,5 cm), mais si les barres de torsion dans un véhicule sont réglées sur 1 po (2,5 cm) au-dessus, la hauteur nette surélevée sera de 2 po (5 cm). La hauteur nette surélevée sera 1 po (2,5 cm) de moins sur les véhicules munis du produit hors-route Z71.ion

FR Aucune protection contre la poussière n'est fournie. Système de protection contre la poussière incorporé au support de montage supérieur É.O.

G7 Check rebound travel at the wheel, 40mm of rebound travel must be maintained to ensure suspension is not in contact with rebound stops as this can result in reduced handling performance. Do not use coil spacers / trim packers that reduce rebound travel to less than 40mm.

ES Compruebe el recorrido de rebote en la rueda. Se deben mantener 40 mm de recorrido de rebote para asegurar que la suspensión no esté en contacto con los topes de rebote, ya que esto puede causar una reducción en el rendimiento de la maniobrabilidad. No utilice espaciadores de resorte espiral / anillos de ajuste que reduzcan el desplazamiento a menos de 40 mm.

FR Vérifiez la course de rebond au niveau de la roue ; un jeu de 40 mm de course de rebond doit être maintenu pour s'assurer que la suspension n'est pas en contact avec les butées de rebond car cela peut entraîner une réduction des performances de conduite. N'utilisez pas de rondelles / de garnitures de ressort susceptibles de réduire la course de rebond à moins de 40 mm.

G8 To maintain 2/3 of OE rebound travel, long travel shock absorbers must be fitted.

ES Para mantener 2/3 del recorrido de rebote del equipo original se deben instalar amortiguadores de largo recorrido.

FR Pour maintenir les deux tiers de la course de rebond, des amortisseurs à course longue doivent être installés.

G9 To maintain wheel alignment and safe handling, castor correction kit must be fitted.

ES Para mantener la alineación de las ruedas y una maniobrabilidad segura, se debe instalar el kit de corrección del ángulo caster.

FR Pour maintenir l'alignement des roues et assurer une conduite sans danger, un kit de correction de roulement doit être installé.

Footnotes / Notas de pie de pagina / Notes en bas de page

G10 To avoid potential over-stressing of the coil spring, the use of bump stop spacers is recommended.

ES Para evitar una sobretensión potencial del resorte de espiral se recomienda utilizar espaciadores de tope de suspensión.

FR Pour ne pas risquer de causer une fatigue excessive du ressort hélicoïdal, l'utilisation de rondelles de butée est recommandée.

G11 To avoid contact between sway bar and differential at full hang when using long travel shock absorber, extended sway bar links must be fitted.

ES Para evitar el contacto entre la barra estabilizadora y el diferencial durante la inclinación máxima cuando se utilice un amortiguador de largo recorrido, se deben instalar varillas de barra estabilizadora extendidas.

FR Pour éviter tout contact entre la barre de stabilisation et le différentiel en suspension à l'arrêt complet lors de l'utilisation d'amortisseurs à course longue, il faut installer des couplages de barres de stabilisation de longueur supérieure.

G12 To maintain brake balance and braking system performance with an increase in body height a Brake Proportioning Valve relocation kit must be installed.

ES Para mantener el equilibrio de los frenos y el rendimiento del sistema de frenos con un aumento en la altura de la carrocería, se debe instalar un kit de reubicación de la válvula proporcionadora del freno.

FR Pour assurer un freinage équilibré et la performance du système de freinage en cas d'élévation supérieure, un kit de repositionnement de répartiteur de freinage doit être installé.

G13 To avoid contact between sway bar and drive shaft at full hang when using long travel shock absorber, sway bar spacers must be fitted.

ES Para evitar el contacto entre la barra estabilizadora y el eje motriz durante la inclinación máxima cuando se utilice un amortiguador de largo recorrido, se deben instalar espaciadores de barra estabilizadora.

FR Pour éviter tout contact entre la barre de stabilisation et l'arbre de transmission en suspension à l'arrêt complet lors de l'utilisation d'amortisseurs à course longue, il faut installer des couplages de barres de stabilisation.

G14 To avoid over-stressing of ABS line (where applicable) when using long travel shock absorber, ABS line relocation kit must be fitted.

ES Para evitar sobretensionar la manguera de ABS (en los casos en que sea aplicable) cuando se utilice un amortiguador de largo recorrido, se debe instalar un kit de reubicación de la manguera de ABS.

FR Pour ne pas risquer de causer une fatigue excessive du système ABS (le cas échéant) lors de l'utilisation d'amortisseurs à course longue, un kit de repositionnement de système ABS doit être installé.

G15 To avoid contact or inversion of sway bar at full hang when using long travel shock absorbers, extended sway bar links must be fitted.

ES Para evitar el contacto o la inversión de la barra estabilizadora durante la inclinación máxima cuando se utilicen amortiguadores de largo recorrido, se deben instalar varillas de barra estabilizadora extendidas.

FR Pour éviter tout contact ou inversion de la barre de stabilisation en suspension à l'arrêt complet lors de l'utilisation d'amortisseurs à course longue, il faut installer des couplages de barres de stabilisation de longueur supérieure.

NOTES

Suspension systems will enhance the off-road performance of your vehicle. It will handle differently; both on and off-road, from a factory equipped passenger car or truck. Failure to drive this vehicle safely may result in serious injury or death to the driver and passengers. **ALWAYS WEAR** your seat belts, **REDUCE** your speed, and **AVOID** sharp turns and other abrupt maneuvers.

Rancho Suspension recommends that if you put on larger than OE wheels & tires and it causes a significant error in the speed registered by the speedometer and mileage on the odometer, that the Speedometer be re-calibrated by a Car Dealer, Speedometer repair shop, or by purchasing an aftermarket speedometer recalibration device.
